

AV Rider

Computer, Projectors, and Displays

Igor provides his own Apple MacBook Air 15" running macOS Sequoia v 15.6.

Video

Igor has a direct HDMI port, and his entire presentation is presented from his computer using a 16:9 display ratio.

Slide Advancer

The client must provide a DSAN Perfect Cue system (or equivalent) for Igor's direct slide control, which connects to his laptop via USB or USB-C port.

Microphone

Igor requires a wireless lavalier (lapel) microphone connected to a professional audio system. A handheld wireless microphone should be available as backup.

Confidence Monitors

Igor strongly prefers at least one confidence monitor, if possible.

No Internet Access

Igor presents using his own laptop with all videos, audio, and content embedded in the presentation. Therefore, no internet access is necessary.

Audio

Igor can use the standard 3.5mm analog headphone jack, USB-C ports, or HDMI, whichever you prefer.

Please note that an audio connection is required.

Computer Location

Igor does not need the computer on stage with him. In fact, he prefers the computer to be placed with the AV crew so it doesn't clutter up the stage.

AV Testing / Soundcheck

Igor requires an A/V check no fewer than 30 minutes before taking the stage.

No Podium

Igor prefers no podium on stage. If one must be present, it must be pushed back so he may walk in front of it unencumbered.

Beverage

Please have a bottle of water available to Igor while on stage.
